

Turning Commitments Into Outcomes

Taylor's ongoing sustainability efforts — part of our Environmental, Social and Governance (ESG) strategy — draw inspiration from this corporate value statement: **Taylor is committed to maintaining high standards by serving as responsible managers of natural resources, being good corporate citizens, and protecting the health and safety of our employees, clients and visitors.**

Measuring the Difference We Make

Each year, we analyze our data to plan sustainability-minded projects that increase efficiency and protect the environment. The following metrics show our progress in 2025 and will help us set future goals:

	Recycling* (tons)	Waste (tons)	Hazardous Waste (tons)	Waste to Energy (tons)	Recycle Rate Goal	Recycle Rate Actual	Diversion Rate Goal	Diversion Rate Actual
2025	38,158	11,631	34.7	4,166	78%	76.6%	87%	85%
2024	27,975	9,131	29.8	4,321	78%	75.4%	87%	87%

*Recycling includes: Paper, plastics, corrugated containers (OCC), metals, electronics, organic waste, yard waste and secure shred tonnage.

Overall tonnage from our waste streams increased in 2025, due to business realignment efforts and resulting facility clean-outs. We were able to manage this with a 1% increase in our recycling percentage and only a 2% decrease in our diversion rate.

We continued to focus on **converting waste to energy**. Nearly 4,200 tons of waste went to waste-to-energy options in 2025. Twelve of Taylor's sites diverted more than 99% of waste from landfills and 10 additional sites sent a portion of their waste to waste-to-energy outlets.

Eleven of Taylor's production facilities were certified both by the **Sustainable Forestry Initiative® (SFI®)** and the **Forest Stewardship Council® (FSC®)** and another 10 were solely FSC® certified.

Taylor has three facilities currently **certified to ISO 14001**. They are: Monterrey, Mexico; Radcliff, Kentucky; Tampa, Florida. We plan to add more facilities in the future.

Taylor Print & Service Solutions has received a Committed badge from EcoVadis in acknowledgment of our ongoing efforts to improve sustainability management companywide.

Sustainability in Action: Taylor P&SS

Taylor Corporation encourages each business unit to pursue other environmental projects directly relevant to their customers and industry sector. For example, Taylor Print & Service Solutions (P&SS) establishes its own waste reduction goals for both diversion and recycling rates.

Waste Reduction*

Diversion

2025 actual performance	69%
2026 goal	65%

Recycling

2025 actual performance	54%
2026 goal	55%

* These numbers are lower than last year due to the decline of traditional paper products and increase in non-recyclable label materials.

CDP SCORE

B

Fighting Climate Change

Taylor Print & Service Solutions also discloses information regarding carbon and climate change risk to the CDP. Considered the gold standard of carbon reporting, the CDP evaluated our performance during 2025 compared to relevant industry peers. We received a Climate Change score of B. The P&SS team is working on improvements for 2026.

The following Taylor companies had FSC® COC certified sites as of the publication date of this report.
