

CASE STUDY

Allianz Field®

Feature wall creates striking focal point

Allianz Field wanted a signature design feature that would enhance the guest experience in its club room. A blend of storytelling, craftsmanship and innovation was needed to create a memorable focal point that reflected the spirit of the organization.

Acrylic Design Associates, a Taylor company, brought this vision to life through the fabrication and installation of a 23-foot-long custom acrylic mural. Designed by Bolster, also a Taylor company, the display includes precision-crafted dimensional acrylic elements, integrated LED motion lighting, and moving components that create depth and visual interest. The result is an immersive architectural centerpiece that transforms the space.
