

Chantecaille

Beautiful creations without the carbon

Chantecaille, maker of natural botanical beauty products, wanted its retail displays to be as easy on the environment as their makeup and moisturizers are on the skin. Taylor's Recrylic® certified recycled acrylic sheets offered a solution.

Taylor custom fabricated an entire system of retail display fixtures for Chantecaille using Recrylic recycled acrylic. More than 1,600 display components were created to Chantecaille's exact specifications. In the end, 66 tons of CO₂ emissions were avoided by using Recrylic instead of virgin acrylic.
