

CASE STUDY

Evereve

Making spirits bright (and more sustainable)

Taylor partnered with Infinity Global to bring Evereve's holiday window displays to life. The goal was to dazzle shoppers while meeting tight deadlines and adding sustainability to every detail.

Our retail signage experts used Recrylic® — the world's only line of certified recycled acrylic sheets — to create some holiday magic with maximum ROI and minimum environmental footprint. A natural alternative to virgin acrylic, Recrylic looks and costs the same but reduces carbon emissions by up to 90%.

Taylor delivered a turnkey solution at speed, from prototyping to nationwide rollout, ensuring that each store received its custom-crafted holiday displays on time and budget.
