TAYLOR

CASE STUDY

The Muth Museum

Bringing legendary sports history to life

The Charles J. Muth Museum of Hinchliffe Stadium sought to celebrate two important chapters in American sports history: the legacy of Negro Leagues baseball and the global impact of the New York Cosmos professional soccer club.

Taylor helped transform the museum environment into an immersive experience that connects local sports history with new generations of fans. Vibrant, full-color graphics were printed on Sintra® and installed by Taylor. Each graphic features historic imagery and stories representing either the Negro Leagues or the New York Cosmos.
