

Contactless Patient Check-In

Completed on-site or during a virtual care visit

It is more important than ever that patients and providers have safe and efficient methods of communication. Taylor Healthcare's digital solutions allow for contactless patient check-in to support both your virtual care and on-site environments.

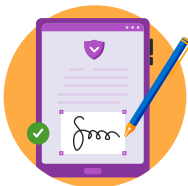

Solutions for the Entire Health System

Taylor Healthcare's check-in and remote signature capture capabilities allow easy access to required intake documentation, delivered and viewable in seconds on the patient's own device.

Send

Forms are automatically assigned to the patient based on configured business rules and securely sent to the patient.

Sign

The patient receives the invitation and then electronically reviews, updates and signs all documentation.

Submit

Submitted documentation is sent to the document repository and discrete data fields are sent to downstream systems.

Remote Check-In Benefits

- Enhance employee and patient safety
- Reduce the potential for infection
- Decrease reliance on shared devices
- Improve patient experience
- Increase operational efficiency
- Ensure compliance
- Reduce costs

Flexible Solutions

- Interoperable with electronic health records
- Modifiable to fit within hospital branding
- Nothing for patient to install or download
- Accommodates registration, legal, financial and clinical documentation
