

Fabric Signs and Graphics

A versatile approach to visual displays

Fabric signage is one of the hottest trends in visual displays. The vibrant, deeply saturated colors possible with fabric printing are ideal for large-format backlit displays as well as non-backlit uses including banners, retractable signs, table toppers and other options. The applications are unlimited:

- Bank lobbies
- Bars and restaurants
- Corporate offices
- Galleries and museums
- Medical facilities
- Public buildings
- Retail stores
- Trade shows and events

Money-Saving Versatility

Durable and easy to work with, fabric signs and graphics can be changed out quickly with minimal resources — no professional installers are needed after initial setup. Purchase a frame once and you'll save money over time as replacement fabric graphics are folded and shipped economically instead of requiring costly rigid flat-pack containers.

- Furniture and fixture integration
- Mid-store applications
- Perimeter walls
- Point-of-purchase displays
- Store windows

Performance Advantages

Taylor uses state-of-the-art dye-sublimation technology and high-quality materials to create richly detailed fabric signs and graphics. We were among the first to offer silicone-edge graphics (SEG) technology and have since produced millions of square feet of SEG in every imaginable size and shape. Whether you need a temporary solution or a permanent installation, fabric signs and graphics from Taylor are a versatile, cost-effective way to make a visual impact.

- Durable and flame retardant
- Easy to install and replace
- Environmentally friendly
- Leading-edge 4K print technology
- Low shipping and storage costs
- Sophisticated appearance
- 10-foot grand format options

LED Light Boxes

LED light boxes work especially well with fabric signage, offering better aesthetics than fluorescent lighting and reduced energy costs.
