#### Conclusion

Direct mail marketing remains **highly effective**, supported by insights from Taylor's survey of 220 professionals across multiple industries.

#### **Direct Usage Across Sectors**

Retail, manufacturing, financial services and healthcare dominate direct mail adoption.

#### **Varied Company Sizes**

Direct mail is used across businesses of all revenue levels, from large enterprises to smaller firms under \$1 million.

#### **Higher Frequency & Impact**

**87% of businesses** run direct mail campaigns at least four times per year. Common materials include brochures/catalogs, postcards/self-mailers and other print media.

#### **Supplier Search**

**44% of buyers** begin their search for direct mail service providers online.

#### **Evaluation & Purchase Criteria**

Competitive pricing, product quality and delivery time are the top factors influencing supplier selection and purchase decisions.

In summary, direct mail remains an integral marketing tool across industries, with careful consideration given to both the effectiveness of the campaigns and the selection of service providers. Taylor's research highlights the continued importance of targeted and well-executed direct mail strategies.
